

Furniture for gastronomy

Catalogue 2012/2013

*Furniture
you can depend on*

Introduction

Malow is the specialised manufacturer of metal furniture. Our years of experience in sheet metal processing, the strict adherence to the quality processes along with continuous development of technology and production facilities allows us to present the latest offer of stainless steel furniture for gastronomy

In the offer presented in this catalogue, you will find functional, durable and reliable products with modern and ergonomic design. The introduced assortment enables equipping gastronomic facilities with furniture necessary for the basic technological processes, the stainless (AISI430) and acid-proof steel (AISI304) furniture.

The high quality and reliability of our products guarantee the construction and materials used:

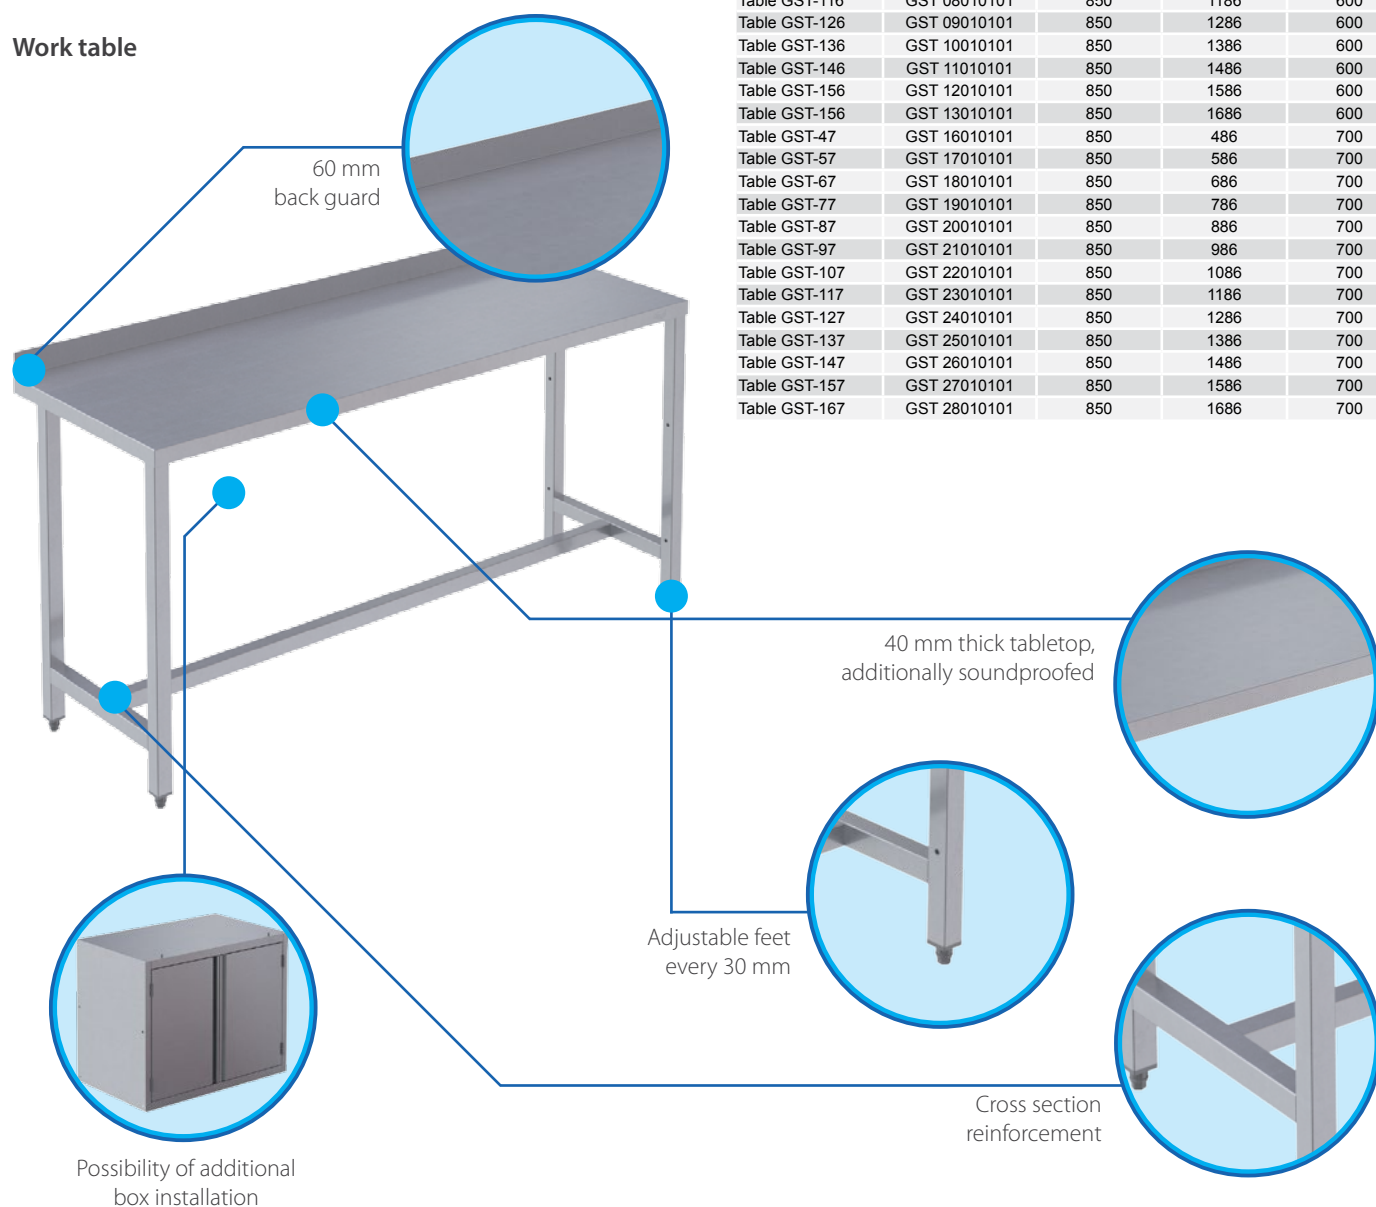

- All products are made of high quality stainless steel: AISI30, AISI 304
- Worktops with sinks are profiled with a 10 mm groove which prevents water from dripping outside the contour of the tabletop,
- All inner edges of sink wells are rounded, which prevents dirt from accumulating and makes it easy to keep them clean,
- Well bottoms are profiled in such a way as to ensure complete discharge of water,
- Wide range of cabinets and boxes - depending on the model - ensures versatile application thanks to the diversity of doors: hinged doors (wing type) or sliding doors fitted with a roll sliding mechanism
- Cupboards with drawers are equipped with roll slides with a load capacity of 40 kg,
- Height adjustable legs are made of high-quality material, which is resistant to scratch and chemicals, easy to clean and to keep clean,
- Mobile products are equipped with self-adjusting castors with flexible tread made of rubber resistant to dirt. Two castors with locks per product are fitted as standard,
- All products are fitted with an earthing pin which makes it possible to attach a cable equalizing electric charges accumulating on worktops.

Work tables

Tables are used for work, pre-treatment and food preparation. A flat tabletop is resistant to damage and it is easy to clean. Furthermore, it is made of 1,0mm thick stainless steel with additional insulation material which reduces vibration and not absorbing water.

Overshelves

Overshelves enable a functional arrangement of the workplace and can be single or double-tiered. A wide range of widths allows fitting over shelves to all our tables and adjusting them to every single gastronomic facility. Feet are made from plastic which protect tabletop against scratching.

Single overshelf

Double overshelf

Wall mounted table with 2 legs

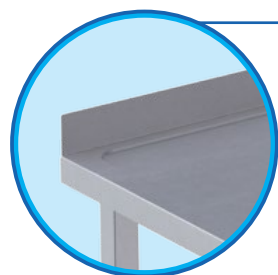

Wall mounted table with three legs

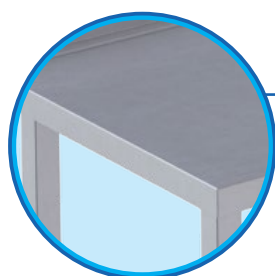

Work tables with sinks

Work tables with sinks are used not only for processing vegetables, meat, fish, but also dishwashing. A single or double sink tables are available. For tables with sink wells, additional equipment can be used: shelves, front casing- page13, boxes-page 5. Worktops with sinks are profiled with a 4 mm groove which prevents water from dripping outside the contour of the tabletop.

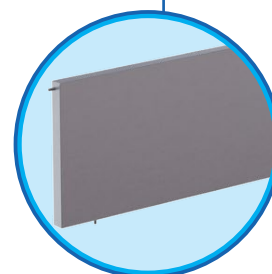

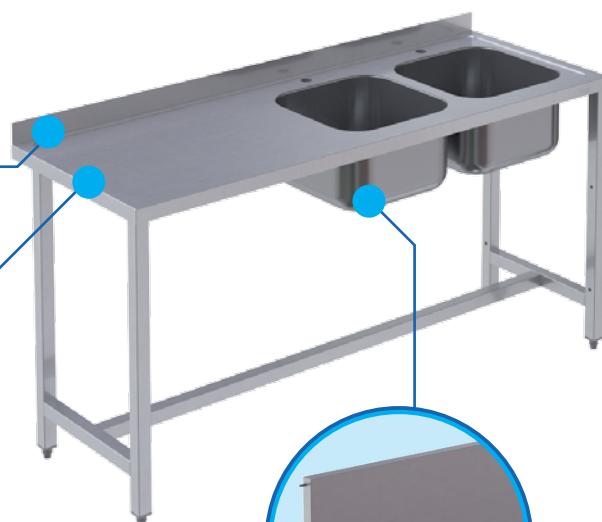

Work table with double sink

60 mm back guard

10 mm groove preventing water from dripping

Possibility of selecting additional equipment (shelves, casing, boxes)

Corner tables

Corner tables allow for a practical arrangement of the workplace and further pre-treatment and preparation of food. A wide range of technical parameters enables a flexible configuration of every workplace. It is also possible to mount a 400mm wide box with a single door and a 400mm wide box with drawers.

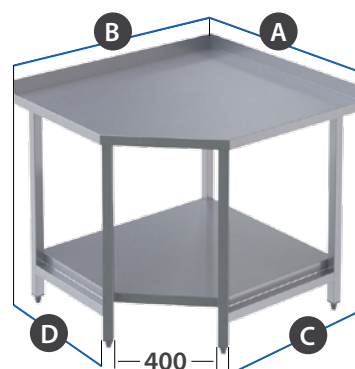

Corner table without shelves

Product name	Product code	Height [mm]	Length A [mm]	Length B [mm]	Length C [mm]	Length D [mm]	Number of shelves

Wall and central hoods

Our hoods are designed to trap and discharge heat, steam and odours arising from frying, boiling and baking etc. processes. Additional equipment for hoods can be used according to individual needs. Accessories for hoods are presented on pages 30-31.

Wall hoods

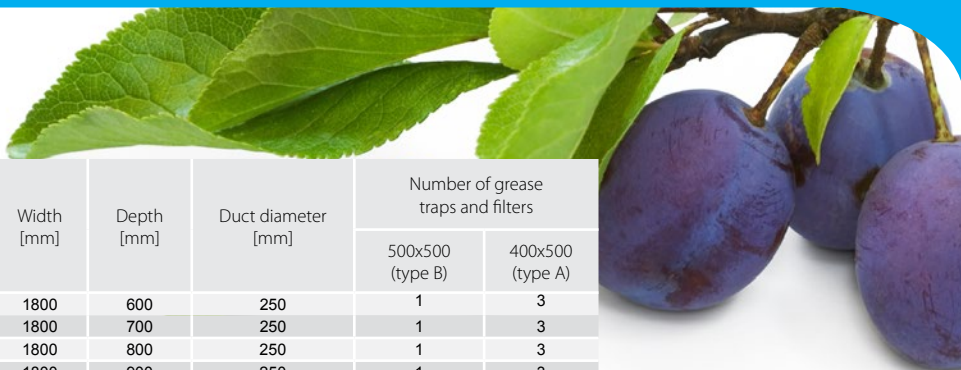

Holder line

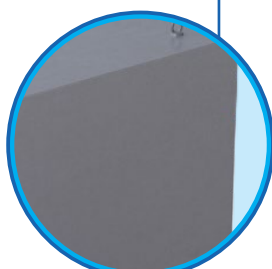

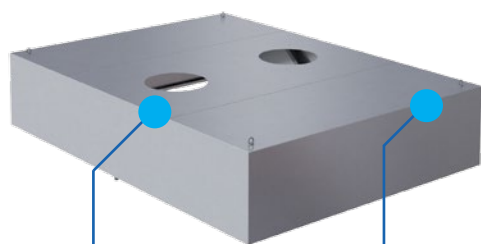

Slot enabling a stub pipe connection and damper attachment

The function of hood is removing the air that flows through the labyrinth grease trap where dirt and grease particles are precipitated and discharged into a cast gutter ended in a release valve.

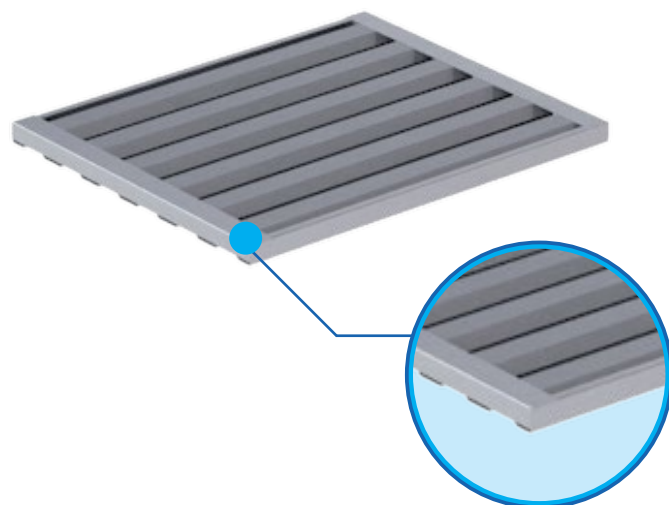

It is recommended that hoods are hanged over kitchen appliances in such a way so as all the vapors produced are entirely placed in an exhaust duct. It is preferred that the hoods mounting is as low as possible in order to avoid spreading unpleasant airflow over an area. The optimal distance of the lower edge of the hood from the floor should be 1900÷2000mm. It is recommended to match the dimensions of the hood in such a way so that the hood sticks out from the outline of the device 0.2÷0.3 – minimum distance between the upper surface of the device and lower surface of the hood.

Accessories for hoods

Grease traps

The grease trap is designed to trap and purify impurities proceeding from kitchen work processes. The construction is entirely made of stainless steel.

Model	Product code	Width [mm]	Depth [mm]
A		400	500
B		500	500

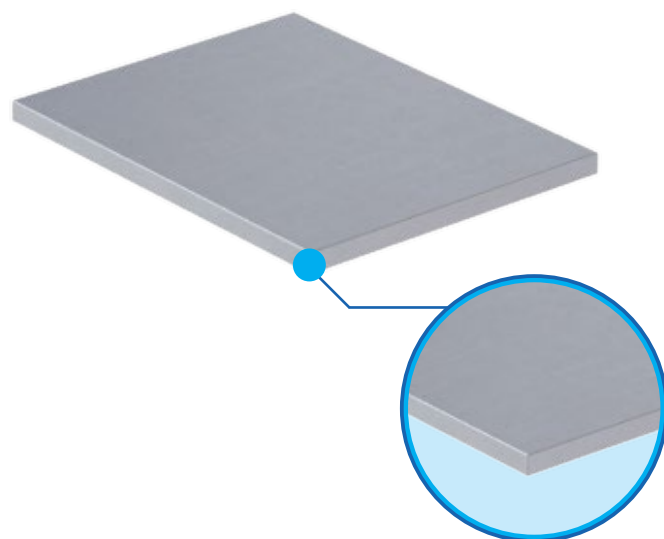

Labyrinth grease trap

Blind filter

If there is too much pressure, the 'blind' filter is used instead of labyrinth grease trap. It has the same dimensions as the grease trap and it is also made of stainless steel.

Model	Product code	Width [mm]	Depth [mm]
A		400	500
B		500	500

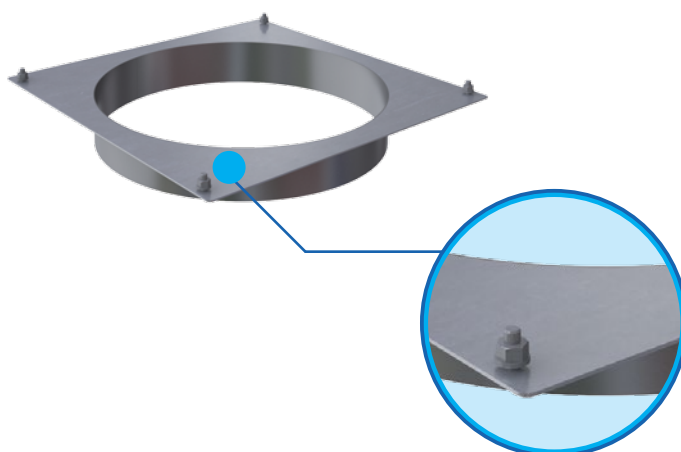

Stainless steel filter

Stub pipe connection

Mounting of the stub pipe connection to the ceiling enables attachment of the hood to the hood exhaust system. A circular cross section stub pipe is made of certified stainless steel.

Model	Product code	Diameter [mm]
A		250
B		315

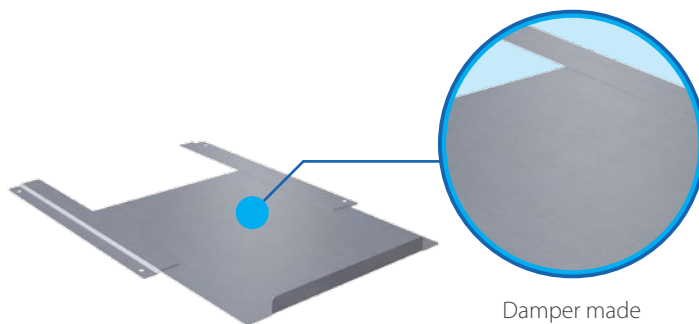

Stainless steel stub pipe connection

Damper

The damper can be installed simultaneously with the stubs pipe connection, thus regulating the amount of exhaust air. Access to the damper is obtained after removing the labyrinth grease traps. A flat damper is made of stainless steel.

Model	Product code	Width [mm]	Depth [mm]
A		305	to pipe connection diameter of 250
B		370	to pipe connection diameter of 315

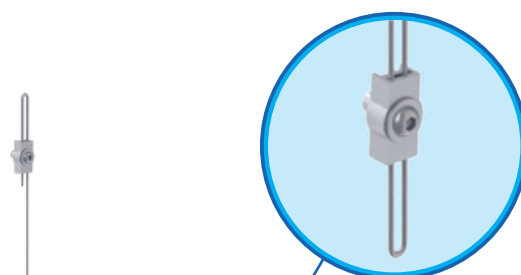

Damper made of stainless steel

Connecting cable

The connecting cable allows mounting hoods to ceiling. The cable length is adjusted to individual needs.

Model	Product code	Length [mm]
A		500
B		600
C		700
D		800
E		900
F		1000
G		1100
H		1200
I		1300
J		1400
K		1500
L		1600
M		1700
N		1800
O		1900
P		2000

Connection cable
